

ABC TidyArm® Secure PC Kit For End User Installation

Product Overview

The TidyArm® Kit enables organisations to improve ICT classroom environments whilst retaining existing furniture and infrastructure. The kit consists of the revolutionary patent pending pivoting TidyArm® together with a secure PC enclosure. Both these have proved popular with schools throughout the UK since their launch in 2005. Together they improve the security, flexibility and cable management of standard PC hardware.

Pivoting TidyArm®

Patent Pending EU Registered Design all steel TidyArm® provides a secure ergonomic mounting for 15"; 17"; 19" TFT monitors using a VESA standard hole pattern. Monitor, keyboard and mouse cabling are managed through the TidyArm® tube. TidyArm® incorporates storage facility for mouse and keyboard when not in use. TidyArm® is movable through 90 degrees to enable students to have unrestricted forward vision. All fixings included. Mass – 6 Kgs.

IMPORTANT NOTE: The TidyArm® has been primarily designed for use on our own TidyArm® Cantilever Desks. This desk provides the necessary stability, with significant mass (65 - 90 Kgs) and low centre of gravity to prevent toppling. It is the specifiers responsibility to ensure that if TidyArm® is fitted to other less robust desks they are satisfied that there are no stability issues.

Cable Management

Eliminates unsightly cable tangles leaving clear desktop for alternative use when computer equipment not required.

Secure PC Enclosure

Internal Widths are 78,108,118,188 & 208 enabling Laptops, small form factor desks tops to midi towers to be housed within the all steel lockable compartment. Unrestricted through ventilation ensures no PC cooling issues; Front lockable hinged flap restricts access to PC to designated staff. Locks supplied (keyed alike). Minimum recommended height from floor to underside of benching is 550mm. Supplied with all fixings to 30mm thick benching. For stability and strength we recommend that the work top is a minimum of 30mm thick. Mass – 9 to 10 Kgs

Finishes

Metal work is finished in Black epoxy powder coat RAL 9005, other colours available on request.

General Information

Full fitting instructions provided. Laser Cut Steel Drilling Templates available.

Quality Testing and Guarantee

All manufacture is by IS9000 accredited UK based suppliers. Guaranteed five years
Designed to work Built to last!
